

Notice to Suppliers

RRES 90009 - Requirements for Design and Development Activities

Originator: Pete Bilbie
Job Title: Engineering Quality Manager
Business Unit: Central Engineering Quality

NTS Number: 530
Issue: 1
Date: 20 February 2021

For the attention of the Engineering Manager and Engineering Quality Manager

Scope/Applicability:

All Rolls-Royce plc suppliers/partners who are contracted to supply Design & Development Activities in accordance with SABRe3/GS3001.

Dear Suppler / Partner,

Introduction:

RRES 90009 is the specification that defines the Requirements for Design and Development Activities carried out on behalf of Rolls-Royce in the supply chain.

This specification has been updated to Revision M to incorporate a number of changes which are identified within the specification with change bars.

Action Required

All Suppliers should access the New Revision, via the Global Supplier Portal, and familiarise themselves the changes to ensure their Design Management Systems meet the requirements within the specification.

All Suppliers should transition to Revision M within 6 months of this NTS unless otherwise stated in their contract.

Any questions or concerns regarding this specification or its applicability should be forwarded to your usual Rolls-Royce point of contact.

Note: The initiative launched with the AESQ (Aero-Engine Supplier Quality group) to create a common cross-industry international standard for Design and Development Requirements continues. Future adoption of this standard for Aerospace supplier/partners will be subject to a further communication.
