Application of Component Proving on Pegasus Engine Parts.

For the attention of the Managing Director

Dear Sir or Madam,

Scope:

- All suppliers operating to SABRe processes and in receipt of purchase orders from Rolls-Royce Business Units covering the manufacture / supply of Pegasus Engine parts.

Background:

- The Pegasus engine project team are aware there are a significant number of Pegasus engine parts produced by the supply chain that are currently identified for Component Proving.
- Due to a combination of reducing new engine schedules, and lessons learnt from both audit & review, allied to the deployment of Component Proving on all new engine programmes, it has been decided to re-scope this activity on Pegasus parts.
- Therefore, a revised list of Pegasus parts have now been selected for Component Proving taking cognisance of the pareto spares schedules required to support this engine programme in service and as a consequence this activity will now be restricted to the following 11 part numbers only:

B511663	B511677	B511847	B514141	B515005	B515425
B516264	B518037	B518435	B518988	B929934	

Action Required:

- Cascade the content of this NTS within your company / personnel as necessary and action accordingly (ref. SABRe: FAIR & Component Proving Process) on any of the above part numbers for which you either have, or may receive purchase orders.
- All Pegasus parts remain subject to 100% inspection and "customer eyes overcheck", with specific reference to both being formally declared on all Release Notes covering shipments made to Rolls-Royce.
- Suspension of the requirement for component proving on any Pegasus part number not listed above will be authorised by Rolls-Royce on a signed Component Proving Closure Sheet.
- For any additional information, contact the relevant Product Technical Controller (PTC) or equivalent, from the Rolls-Royce Business Unit issuing the purchase order(s).

Yours faithfully,
for Rolls-Royce plc.

Richard Hawkins.
Head of Supplier Quality
Rolls-Royce Purchasing.
