Notice to Suppliers

Rolls-Royce

eFAIr / Net-Inspect Access and upgrade requirements

Originator: Dave Hale
Job Title: Chief of ME External Supply Chain
Business Unit: Central Manufacturing Engineering

NTS Number: 412
Issue: 1
Date: 20th October 2017

For the attention of the Quality Manager
Dear Sir or Madam,

Scope/Applicability:

To suppliers of product for Rolls-Royce Aerospace using the eFAIr Net-Inspect™ based system.

Introduction:

We are making two key upgrades to the application that will affect current users of Net-Inspect™ version 3.

The first upgrade with immediate effect is a simplification to the access requirements for new and existing users of Net-Inspect™. We have removed the need for Exostar Medium Level Certificates (MLoA) and now only require an Exostar Basic Level Certificate (BLoA) to access the system. Both MLoA and BLoA certificates will continue to work when signing onto Net-Inspec™ via the Global Supplier Portal (GSP). Consequently, BLoA is now the the minimum requirement for the GSP.

The second change is an upgrade from the current version 3 to the industry standard version 4 which is scheduled to take place in December 2017. Existing users of version 3 will be contacted in due course by your Rolls-Royce business contact, who will take you through the requirements and time scales associated with this upgrade.

Action Required:

Suppliers who need new Net-Inspect™ account requests and/or renewals of existing accounts should apply for a BLoA certificate through your Exostar MAG desktop. Supplier Federated Identity Service Administrator (FISA's) owners should reject requests for MLoA if they are for Net-Inspect™.

To request a BLoA, please follow the link below
http://www.myexostar.com/FIS/Misc-FIS-Docs/Selecting-a-FIS-Certificate/

To manage your certificates please follow the link below
http://www.myexostar.com/WorkArea/DownloadAsset.aspx?id=329

Potential new users should contact their Rolls-Royce business contact and register their interest to use version 4 of Net-Inspect™.
