

## Rolls-Royce: Enhanced receipting mechanism for serialised material

**Originator:** Adie Crees  
**Job Title:** ERP/SAP Super User  
**Business Unit:** GTSC - Civil Aerospace

**NTS Number:** NTS338  
**Issue 1**  
**Date:** 14<sup>th</sup> February 2013

For the attention of the Managing Director and Quality Manager.

Dear Sir or Madam,

### Scope / Applicability:

Enhanced receipt and tracking of serialised material into Rolls-Royce warehouses. The enhancement only affects gas turbine supply chains.

### Introduction:

We are enhancing our SAP receipting system to improve the recording and tracking of serialised parts (utilising barcode functionality). We will implement the enhancements in Derby and Singapore warehouses during the second quarter of 2013.

Other sectors will implement the enhancement in due course.

### Action Required:

To improve the receipt of serialised material and kits containing serialised parts into Rolls-Royce warehouses, suppliers are reminded that all labelling must adhere to SABRe (Edition 2) - Protection, Packaging and Labelling Guidelines. This will prevent goods receipt issues and material being returned to vendors due to non-compliant labelling.

**NTS Category Type:** General Information / Communication
