

Notice to Suppliers

Changes in Civil OE organisation structure

Originator: Warrick Matthews
Job Title: Chief Procurement Officer, OE
Business Unit: Civil Aerospace Operations

NTS Number: 508
Issue: 1
Date: 20 June 2020

For the attention of the Managing Director

Scope/Applicability:

All suppliers within Rolls-Royce Civil Aerospace Operations.

Dear Supply Partner,

We have announced several changes to our organisational structure in Civil Aerospace Operations that I'd like to make you aware of.

From Monday 15 June, all our colleagues working in Strategic Procurement in Civil Aerospace Operations now report into a new centralised Strategic Procurement function led by our Chief Procurement Officer, Warrick Matthews.

What's changed?

Within this organisation, we have aligned our Buying teams to a new Senior Vice President (SVP) structure, which focusses on the four categories below. This replaces the Strategic Procurement Executive structure that we had previously. This structure will help us to align our suppliers better and will provide more insight for opportunity and collaboration in the supply chain.

For suppliers, your Global Commodity Manager and buyer interface will remain the same, but in some cases mean you will have a new senior management interface into Strategic Procurement. Our teams will contact you in the coming weeks to outline any changes.

- **Senior Vice President - Raw material & Forming:** Benn Godfrey (Interim)
- **Senior Vice President - Complex Machining:** Tom Edwards
- **Senior Vice President - Finished Components:** Enes Oelcer (Interim)
- **Senior Vice President - Design Make:** Paul Morgan

Changes in our Supply Chain Units

Our Supply Chain Unit (SCU), Executive Vice President and Supplier Management contacts will continue to be your key contacts for quality and delivery. We have some senior level changes in these organisations as well.

Turbines: Lee Fromson has moved to Turbines as Executive Vice President. Andy Greasley will be leading a new pan-Operations organisation that will facilitate greater collaboration and effective working across the business.

Compressors: Nigel Bird has been appointed Executive Vice President for Compressors.

Structures and Transmissions: Following a strategic review of our S&T sub-commodities, we have realigned these activities and most of our people in S&T into other SCUs. However, please continue to engage with your existing contacts as we manage a transition.

Thank you for your continued support and please get in touch if you have any questions.
