

# Notice to Suppliers

## RRSL Suppliers – Source Change Guidance

**Originator:** Dhan Hapuarachchi  
**Job Title:** Engineering Improvement Lead  
**Business Unit:** RR Submarines Limited – Supply Chain

**NTS Number:** NTS 635  
**Issue:** 1  
**Date:** 11 October 2025

For the attention of Managing Directors (or similar roles)

### Scope/Applicability:

This notification applies to the Rolls-Royce Submarines Ltd (RRSL) Source Change process, as set out in GS3001v24, section 6.15.

**Dear Supply Partner,**

### Introduction:

At the end of 2024, we issued a notification (NTS 618) regarding non-compliance with the Source Change process. Following that event, we undertook a quality investigation and introduced a set of preventative actions to reduce the risk of recurrence.

To support you further, we have prepared a simple logic diagram to assist with assessing the applicability of source change which supplements GS3001. This is intended as a guide. If you are uncertain at any stage, please contact your Rolls-Royce point of contact for clarification.

The document is available in the Global Supplier Portal, under the Supplier Documents section. It has also been attached to this NTS for reference. Please review it and incorporate it into your internal processes.

If you have any questions, contact your nominated Rolls-Royce representative.
