

Notice to Suppliers

RRES 90009 - Requirements for Design and Development Activities – Revision R

Originator: Sandra Wrobel

Job Title: Chief of Internal & Supplier Quality - Audit & Compliance (Group ET&S)

Business Unit: ET&S / Engineering Quality

NTS Number: NTS 653

Issue: 1

Date: May 2026

For the attention of Engineering/Quality Managers

Scope/Applicability: All Rolls-Royce suppliers/partners who are contracted to supply Design & Development Activities in accordance with SABRe/GS3001.

Dear Supply Partner,

RRES 90009 is the Specification that defines the Requirements for Design and Development Activities carried out on behalf of Rolls-Royce in the supply chain.

This specification has been updated to Revision R to incorporate changes for suppliers to all Rolls-Royce businesses who work in accordance with SABRe.

Tooling Design requirements from former RRES 90059 have been included into RRES 90009 as Supplier Type K. An additional communication (NTS) to Tooling Design Suppliers will be published in the near future. Additionally remaining requirements from EDS-733 have been included as well.

Both specifications – RRES 90059 & EDS-733 will be withdrawn/superseded with RRES 90009.

Action Required:

- All Suppliers within the Scope/Applicability above should access the new revision via the Global Supplier Portal and familiarise themselves with the changes to ensure their Design Management Systems meet the requirements within the specification.
- Any questions or concerns regarding access to this specification or its applicability should be forwarded to your usual Rolls-Royce point of contact.

NTS Category:

Engineering/Technical
