

Notice to Suppliers

SABRe: Publication of SABRe DCP Revision 2.1

Originator: Michael Bolton
Job Title: Quality Manager – Capability
Business Unit: Quality

NTS Number: NTS 659
Issue: 1
Date: October 2026

For the attention of the Managing Director and Quality Manager:

Scope/Applicability:

This NTS applies to all suppliers who supply Development Configured Parts (DCP) related to Civil or Defence Rolls-Royce Aerospace contracts/purchase orders; or parts for the Merlin, Griffon, or Gipsy Major engine types.

Dear Supply Partner,

SABRe DCP formally communicates Rolls-Royce requirements and expectations to the external supply chain in relation to Development Configured Parts. In response to changes in regulation, user feedback, and Rolls-Royce's commitment to people and product safety, SABRe DCP has now been updated to SABRe DCP Revision 2.1. In addition, the scope of SABRe DCP has been extended to include parts for Merlin, Griffon and Gipsy Major engine types, collectively referred to as Heritage Engines.

Key changes include:

- **Heritage Engines:** Addition of Heritage Engines spares to scope, and associated specific requirements e.g. FAIR, Supplier Approvals.
- **Approval Requirements:** Updates to certain supplier approval requirements, clearer pass-through to SABRe OE for specific Supplier Types e.g. Distributors.
- **Safety:** Reinforced Leadership commitment to People Safety, expanded Product Safety Training requirements, and added controls on usage of Artificial Intelligence.
- **Contamination:** Expanded contamination control requirements in alignment with SABRe OE.
- **Whole document:** Wording simplification & clarity, removal of RR Electrical references.

Action Required:

Suppliers/Partners of Development Configured Parts or Heritage Engine parts are required to:

1. Review SABRe DCP Revision 2.1 and complete an updated SABRe DCP Self-Assessment.
2. Fully comply to SABRe DCP Revision 2.1 by no later than 28th February 2027.
