

Export Control Compliance page released on the Rolls-Royce Global Supplier Portal

Originator: Malcolm Budd
Job Title: Export Control Manager
Business Unit: Global Purchasing

NTS Number: 379
Issue: 2
Date: 5th December 2015

For the attention of Directors responsible for Export Control Compliance

Dear Sir or Madam,

Scope/Applicability:

All suppliers to Rolls-Royce.

Introduction:

As part of enhancements to our export controls compliance regime, we have released a page on the GSP (Global Supplier Portal) entitled "Export Controls Compliance".

The new page sets out our policy on compliance with strategic export control laws, regulations and procedures of all relevant jurisdictions and regimes in which we operate. It mandates the activities that suppliers must undertake when supplying export controlled products, services and associated technology to Rolls-Royce. This enhancement to our export compliance mechanism will help to protect us and our supply chain from regulatory non-compliance and any related impact on delivery, customer satisfaction and financial risk.

Action Required:

Suppliers should review the requirements of the new GSP page and, where applicable, ensure that appropriate mechanisms are in place to support and comply with the activities mandated. The page can be found by using the navigation links from the right hand side of the supplier documents homepage on the [Global Supplier Portal](#) and clicking on "Export control".
