

Notice to Suppliers

Partnering with Suppliers for Cyber Security

Originator: Neil Brink
Job Title: Supply Chain Cyber Security
Business Unit: Group Procurement

NTS Number: 605
Issue: 1
Date: 19 March 2024

Scope/Applicability:

All Rolls-Royce Group suppliers.

Dear Supply Partner,

Introduction:

Rolls-Royce wants every supplier in our network armed with the latest and best information on how to protect against cyber-attacks. To help with that, we have launched “The Cyber Forecast,” a newsletter packed with tips, tools, and advice from our cyber experts. You can subscribe by sending an email to TheCyberForecast@rolls-royce.com.

Why This Is Worth Your Time:

Each monthly newsletter provides information you won't get anywhere else. We used the newsletter to release a 2023 summary of our supply chain cybersecurity incidents – data we have not shared so widely before. You will also hear from our cyber experts on threats they see and from suppliers in our network who describe the unique steps they are taking to combat threat actors.

How to Sign Up

Send an email to TheCyberForecast@rolls-royce.com. Please share this Notice To Suppliers with other members of your team, especially those who are close to cyber security. And invite any of your suppliers that support Rolls-Royce contracts to sign up.

Where to Find Other Resources

“The Cyber Forecast” is just one tool in our kit. You can find essential cyber security information – including requirements, incident response guidelines, and links to webinars – on our [dedicated web page](#).

Why Now?

A cyber secure supply chain is crucial for Rolls-Royce's customers and for every supplier in our ecosystem. “The Cyber Forecast” is another way we are helping to bolster our collective defences.

Note: Rolls-Royce's [Global Data Privacy Policy](#) details how we protect the information we collect. Additional information can also be found here: [Data privacy | Rolls-Royce](#).
