

Quality Clause 240806 - Test Requirements (08/20/18)

Suppliers will perform activities and provide documentation for any part needing testing for part compliance to part specifications. Examples of this documentation may include first article reports or specific reports for functional, noise, pressure, electrical, or leakage testing. Suppliers must contact Rolls-Royce Quality to determine specific reports that must be provided to meet these requirements.

Subject to US export requirements, Suppliers must email reports at the time of invoicing to RRNMI.Certs@Rolls-Royce.com with the purchase order (PO) number and part number referenced in the email subject line in the following format: "Report(s) for PO XXXXXXXXXXX, Part Number YYYYYYYYY".

Supplier emails with attached files must be less than 10 MB in size due to Rolls-Royce email system limitations. We recommend the email subject line format: "Report(s) for PO XXXXXXXXXXX, Part Number YYYYYYYYY 1st of X Emails" should multiple emails be required due to file size limitations. Documentation must be legible and of reproducible quality. Files cannot contain macros or executables.
