

Quality Clause 242500 - Source Inspection, In-process (08/24/18)

The Buyer reserves the right to conduct inspections of detail parts (prior to or during assembly) to witness operational, pressure or NDT type tests. Buyer's QA personnel shall be permitted to enter the Supplier's facility for the purpose of inspection of material or review of Supplier's quality control records, methods, procedures, and other items when deemed necessary by Buyer's Quality Control personnel in assuring compliance with the contractual requirements of the purchase order.
