

Quality Clause 242701 - Source Inspection, Government (09/13/19)

Government source inspection (GSI) is required during manufacture and prior to shipment from your facility. Upon receipt of this order, promptly notify the government representative who normally services your facility so that appropriate planning for GSI can be accomplished. In the event a government representative or government office cannot be located, the Rolls-Royce Buyer should be promptly notified.

The government representative must be allowed to inspect and test all items on the order on-site prior to acceptance and shipment. If the government representative chooses to perform inspection or test, the supplier must provide reasonable facilities and assistance for the safe and convenient completion of these activities. All records shall be made available to the government representative, if requested.

Documentation having the government representative stamp or signature on the packing slip must be provided to Rolls-Royce supporting the inspection and shipment approval.
