

# Notice to Suppliers

## AS13003 Requirements for Civil Aerospace

**Originator:** Simon Gough-Rundle  
**Job Title:** Civil Aerospace Chief Metrologist  
**Business Unit:** Civil Aerospace

**NTS Number:** 466  
**Issue:** 1  
**Date:** June 2019

For the attention of the Managing Director and Quality Manager

**Dear Sir or Madam,**

### **Scope/Applicability:**

All suppliers to our Civil Aerospace supply chain.

### **Introduction:**

NTS 377 introduced **AS13003 - Measurement Systems Analysis Requirements for the Aero Engine Supply Chain**. This standard has several instances where “purchaser requirements” may supplement that defined by the standard.

Rolls-Royce has authored a supplementary document, **AS13003 Requirements for Rolls-Royce**, in order to answer these requirements and simplify understanding for the Civil Aerospace supply chain. This is available on the SABRe Global Supplier Portal in the Supplier Documents section within the SABRe Edition 3 – Aerospace SABRe section.

### **Action Required:**

All Civil Aerospace suppliers are to read the **AS13003 Requirements for Rolls-Royce** document and comply with these requirements for all future Measurement Systems Analysis activity.

### **NTS Category:**

Engineering/Technical

### **Authorised by:**

Fraser McIntosh  
Head of Manufacturing Engineering, Civil Aerospace
