

Hazardous chemical substances used in the manufacture of Rolls-Royce products

Originator: Darren Green
Job Title: Chief of Materials – Labs & Manufacturing
Business Unit: Engineering & Technology

NTS Number: 391
Issue: 1
Date: 10th June 2016

For the attention of Managing Director

Dear Sir or Madam,

Scope/Applicability:

All suppliers and partners who supply parts or services related to Rolls-Royce contracts or purchase orders.

Introduction:

Rolls-Royce adheres to high standards of Health, Safety & Environment (HS&E) practices. This includes the control of hazardous substances used during the manufacture, maintenance and servicing of our products. Our new policy eliminates the use of certain substances of high HS&E concern from our product portfolio.

This policy is communicated via MLC132, which is available via the [Global Supplier Portal](#).

Action Required:

All suppliers and partners must read and ensure that they are compliant with the requirements specified in MLC132.
