

## New electronic DAR submission process

**Originator:** Leslie Wanick  
**Job Title:** Manufacturing Engineering Manager  
**Business Unit:** Installations

**NTS Number:** 424  
**Issue:** 1  
**Date:** March 2018

For the attention of the Quality Manager

**Dear Sir or Madam,**

**Scope/Applicability:**

To all suppliers of the Rolls-Royce Aerospace Supply Chain (Civil & Defence product)

**Introduction:**

As part of a transformation program into digital systems, our intention is to implement a new electronic Definition Alteration Request (DAR) solution.

This will take the form of a web-based tool containing the whole DAR process from submission to final approval, and will make the DAR process more transparent by providing real-time status of DARs to suppliers.

The implementation is planned for mid-2018 and will be subject to a further communication.

**Action Required:**

We will be contacting suppliers in the coming weeks to register your DAR submission user nominee details. This information will be used to create your e-DAR account.

During March an awareness webinar will be launched to provide more details about the e-DAR system, and this will be subject to a further communication.

**NTS Category:**

SABRe
